

PORTFOLIO OF COMPLETED PROJECTS

A.I. Marketing Engine

Built a full webpage for a new drone product launch. The webpage included a call booking form (Calendly), a waitlist for the drone's release, an email subscriber sign-up list, a Discord Drone Community, and the contact details.

Skills: Web Design, SaaS Tools, Waitlist Setup, Email Automation, A.I. Prompting, Graphic Design

TOOLS USED:

App Design

Designed the layout for a Venmo-like mobile app to send money to your contacts. Created the mobile UI mock-ups for the app's visual design and layout, chose images/icons, and created the user experience flow for sending money to a contact.

Skills: Mobile App Design, User-Interface Mockups

TOOLS USED:

ChatGPT

Figma

Font Awesome

Google Docs

Google Forms

Stable Diffusion

Unsplash

Architecture & Modern Design

Used beginner and pro tools like Planner5D and SketchUp to create 2D and 3D floor plans, added walls, furniture, & fixtures. Planned flow between rooms, window placement, furniture layout, and even outdoor areas.

Skills: 2D Modeling, 3D Modeling, CAD Tools, Floor Plans, Room Sizing, Furniture Layout, Outdoor Planning

TOOLS USED:

Planner 

 SketchUp

Automation Station

Created multi-step automations including a waitlist notification, task delegation, and automated file handling using Zapier. Integrated tools like Slack, Trello, Google Drive, and Google Sheets, To-do list apps, and Google Forms. Used Loom to record the automations and submit it for approval.

Skills: Task Automation, Task Management, Workflow Optimization

TOOLS USED:

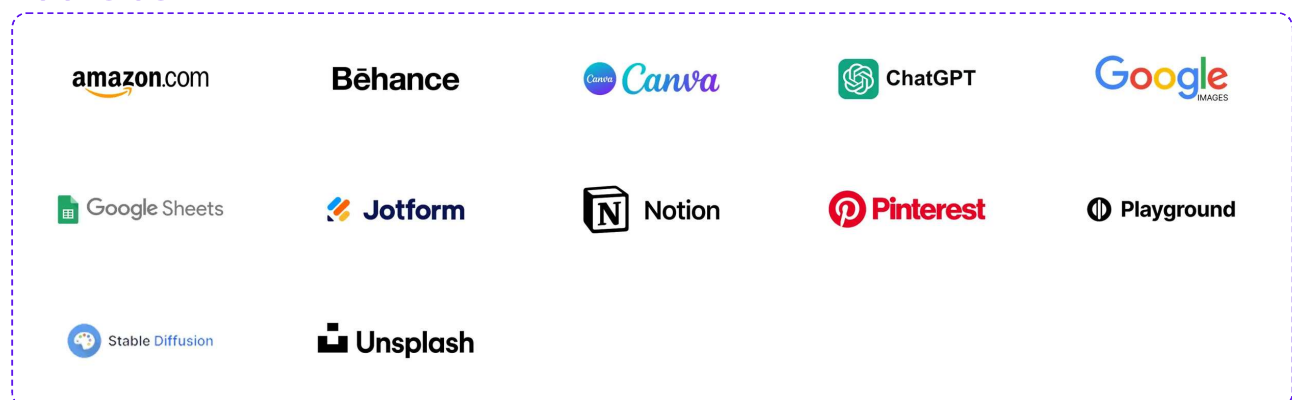

Business Media Warrior

Created social media content for a business including posts promoting new events, discounts, educational tips, company news, customer testimonials, and online surveys. Used ChatGPT to brainstorm ideas and make the post more concise. Created logos and images with Canva, then created a social media calendar plan on Notion.

Skills: Social Media Planning, Social Media Copywriting, A.I. content generation, Basic Canva design, Survey Creation, and Content Scheduling, Market Research

TOOLS USED:

Content Creator

Produced short-form content for social media, including a simple product animations, voiceover commercials, TikTok product demos, and Loom instructional tutorials. Used CapCut to piece together clips, add subtitles, and edit soundtracks. Used Loom for screen sharing and personal camera recording. Practiced clear speaking, straightforward steps, and a casual tone. Finalized each video for private hosting, making them ready to view and share.

Skills: Short-Form Video Editing, Voice-Over & Editing, Screen-Recording Methods, On-Camera Presentation, And Basic Content Hosting

TOOLS USED:

Film & Digital Media

Created two movie trailers using stock footage, royalty-free music, voice-overs. sound effects, and A.I.-generated clips. Edited clips inside of CapCut to create a cinematic trailer and a comedy trailer with titles, quick cuts, and cinematic edits. Used tools like Pollo, RunwayML, and YouTube downloaders for additional content. Hosted final videos on Wistia for easy viewing.

Skills: CapCut, Cinematic & Comedic Timing, Stock Footage & Audio Sourcing, A.I. Video Tools, Sound Effects, Video Hosting.

TOOLS USED:

Fitness & Wellness

Student completed various nutrition tracking, exercise logging, yoga, & meditation exercises. Calculated personal BMR using online tools, tracked meals with SnapCalorie, and logged workouts in the Agit App. Practiced yoga and meditation through guided YouTube and app-based sessions. Organized all deliverables with screenshots, extensions, and Google Drive for submission.

Skills: Nutrition Tracking, Fitness Logging, Habit Tracking, Chrome Extensions, Mobile Health Apps, Basic Data Entry & Reporting.

TOOLS USED:

Calculator.net

headspace

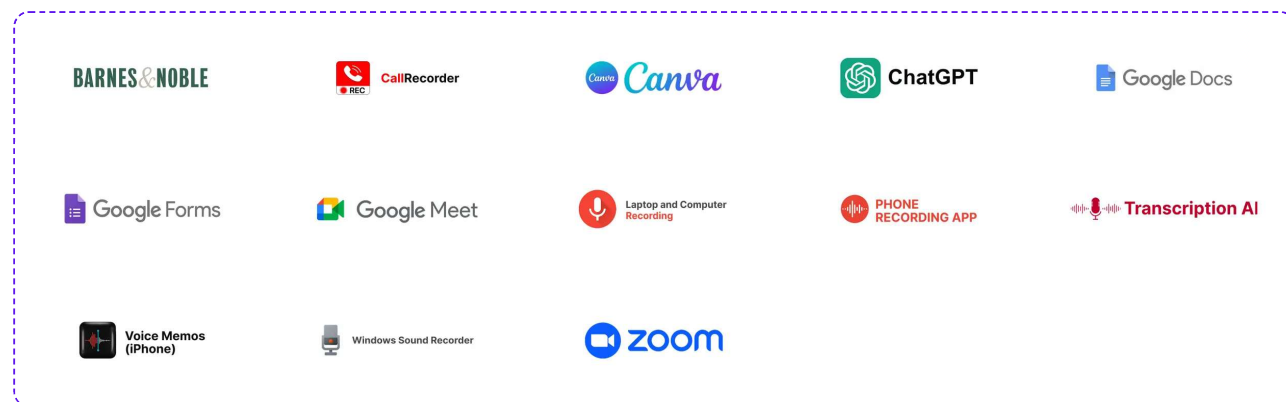

LifeStory Book

Completed a set of recorded interviews to gather personal stories and life lessons, transcribed the audio into text using online tools, and used A.I. to create the contents of a short family legacy book. Created front and back covers in Canva, added family pictures, and the dedication page. Finalized the layout in Google Docs and uploaded the PDF to a book printing service (Barnes & Noble) for a physical hardcover copy.

Skills: Conducting Interviews, Audio Transcription, AI-Assisted Writing, Simple Book Layout, Canva Design, And Basic Print Preparation.

TOOLS USED:

Real Estate & Investments

Explored six types of real estate properties—beachfront, downtown, luxury, upper-middle, middle, and affordable—analyzed rental profits with Zillow, Rentometer, and mortgage calculators, compared profitability between single family home rentals and Airbnb rental properties, and designed real estate listing using Canva

Skills: Real Estate Market Analysis, Mortgage & Interest Calculations, Rental Cash Flow Calculations, Short-Term & Long-Term Rental Strategies, and Airbnb Income Comparisons

TOOLS USED:

Bankrate

Software, Features & Bugs

Built a Tic Tac Toe web app using HTML, CSS, and JavaScript. Used Jira to manage tickets for features, bugs, and tasks. Used Cursor to write functions like checking win conditions and updating the game board. Estimated story points, tracked progress through sprints, and organized tasks in a product feature backlog. Used GitHub for saving work and submitting the final project.

Skills: Web Development (HTML, CSS, JS), JIRA, Bug Tracking, GitHub

TOOLS USED:

Stock Analysis Challenge

Researched and evaluated companies by analyzing stocks, reading financial documents, and running simulations. Used tools like MarketWatch, Google Sheets, and AI research apps to track real-time stock data and understand investing terms like market cap, P/E ratio, and earnings per share. Calculated investment returns, practiced buying and selling stocks using simulated portfolios, and created charts and comparisons to understand the S&P 500, the MAG7, and billionaire investor strategies.

Skills: Stock Market Analysis, Financial Research, Market Simulation, Portfolio Tracking, Google Sheets, AI Research, Public Financial Filings.
